

## Consumer price indices

October 2009

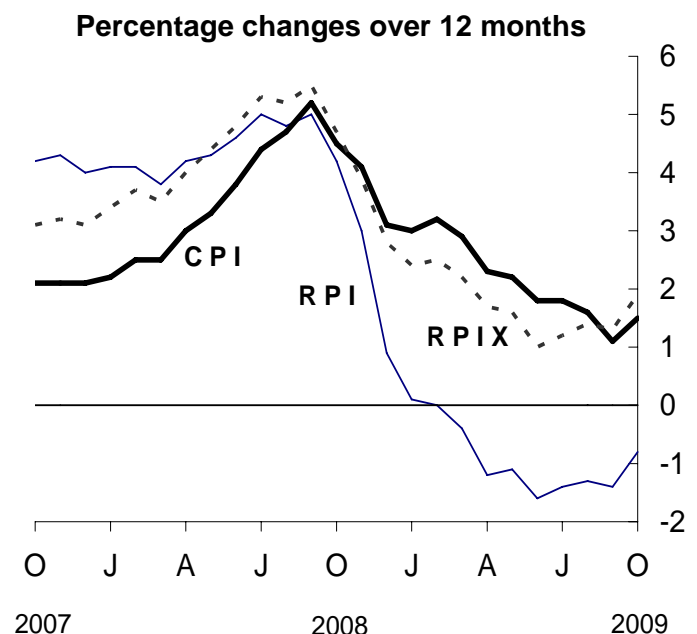

**Date:** 17 November 2009

**Coverage:** United Kingdom **Theme:** The Economy

In the year to October, the consumer prices index (CPI) rose by 1.5 per cent, up from 1.1 per cent in September.

In the year to October, the all items retail prices index (RPI) fell by 0.8 per cent, compared with a fall of 1.4 per cent in September.

Over the same period, the all items RPI excluding mortgage interest payments index (RPIX) rose by 1.9 per cent, up from 1.3 per cent in September.

		CPI		RPI		RPIX	
		Index (2005 = 100)	Per cent change over 12 months	Index (Jan 1987 =100)	Per cent change over 12 months	Index (Jan 1987 = 100)	Per cent change over 12 months
2009	May	110.7	2.2	212.8	-1.1	212.0	1.6
	Jun	111.0	1.8	213.4	-1.6	212.6	1.0
	Jul	110.9	1.8	213.4	-1.4	212.6	1.2
	Aug	111.4	1.6	214.4	-1.3	213.6	1.4
	Sep	111.5	1.1	215.3	-1.4	214.5	1.3
	Oct	111.7	1.5	216.0	-0.8	215.1	1.9

Further information on CPI is available at [www.statistics.gov.uk/cpi](http://www.statistics.gov.uk/cpi)

### Main contributions to change in the CPI 12-month rate<sup>1</sup>

By far the largest upward contribution to the change in the CPI annual rate came from transport. The largest upward effect came from fuels and lubricants, where prices fell by 0.7 per cent between September and October this year compared with a fall of 6.1 per cent a year ago. The 6.1 per cent decrease a year ago was the largest ever fall in fuel and lubricants between a September and October. This was due to sharp falls in petrol and diesel prices, reflecting the falling price of crude oil in the latter half of 2008. Within transport there were also large upward contributions from:

- the purchase of second-hand cars where prices rose this year at their fastest ever rate (1.1 per cent) between a September and October but fell a year ago
- air transport where, overall, fares increased by 1.5 per cent this year but fell significantly a year ago; in fact, the 6.2 per cent decrease in 2008 was a record fall between a September and October

Finally within transport, there was a small upward contribution from sea transport where prices fell but by less than a year ago.

There were also large upward contributions from:

- Recreation and culture where prices rose between September and October this year but fell a year ago. The largest upward effects came from recording media and, to a lesser extent, from games, toys and hobbies. Within recording media the largest upward contribution came from DVDs; within games and hobbies the largest upward effect came from computer games
- Food and non-alcoholic beverages, mainly due to food where, overall, prices increased by more than a year ago. Within food the largest upward effect came from meat

<sup>1</sup> The CPI and RPI use different classification systems. Background Note 12 shows how, for each of the two indices, the main categories contributing to changes in the 12-month rate relate to each other.

(particularly pork products) with the next most significant upward contributions coming from bread and cereals and vegetables

- Communication, where prices rose between September and October this year by more than a year ago, mainly due to increases in landline telephone charges

There was a small upward contribution from furniture and household goods mainly due to carpets and rugs where prices rose between September and October this year but fell a year ago.

The largest downward contribution to the change in the CPI annual rate came from miscellaneous goods and services. By far the largest downward effect within this division came from banking services where prices fell by more than a year ago, mainly due to reductions in bank overdraft charges and mortgage arrangement fees. Partially offsetting these effects was a small upward contribution from house contents insurance where prices rose by more than a year ago.

**Miscellaneous goods and services**  
CPI percentage changes over 12 months

There was also a large downward contribution from education where university fees rose this year but by less than a year ago.

There was a small downward contribution from housing and household services where rents for housing were little changed between September and October this year but rose a year ago.

### Main contributions to the change in the RPI 12-month rate

By far the largest upward contribution to the change in the RPI annual rate came from motoring expenditure. The largest upward effect came from petrol and oil, where prices fell between September and October this year but by less than a year ago. The price of petrol fell by 1.7 pence per litre this year to stand at 104.7 pence, compared with a fall of 5.2 pence per litre a year ago. Diesel prices fell by 1.4 pence per litre this year to stand at 105.7 pence, compared with a fall of 5.5 pence per litre a year ago. A similar large upward effect came from the purchase of motor vehicles, where prices increased between September and October this year but fell

**Motoring expenditure**  
RPI percentage changes over 12 months

a year ago. Within this division there was also a small upward contribution from car insurance where prices rose this year but fell a year ago.

There were also large upward contributions from:

- Housing, with the main upward effect coming from house depreciation which rose this year but fell a year ago, reflecting movements in the smoothed house price index from the Department of Communities and Local Government that is used to calculate this component. There was also an upward effect from dwelling insurance and ground rent, which rose between September and October this year but fell a year ago. Partially offsetting these upward effects were rents for housing and mortgage interest payments, which both increased but by less than a year ago
- Food, principally due to non-seasonal food products where, overall, prices rose between September and October this year but fell a year ago
- Fares and other travel, with by far the largest upward effect coming from air fares where prices increased between September and October this year but fell sharply a year ago

There were small upward contributions from:

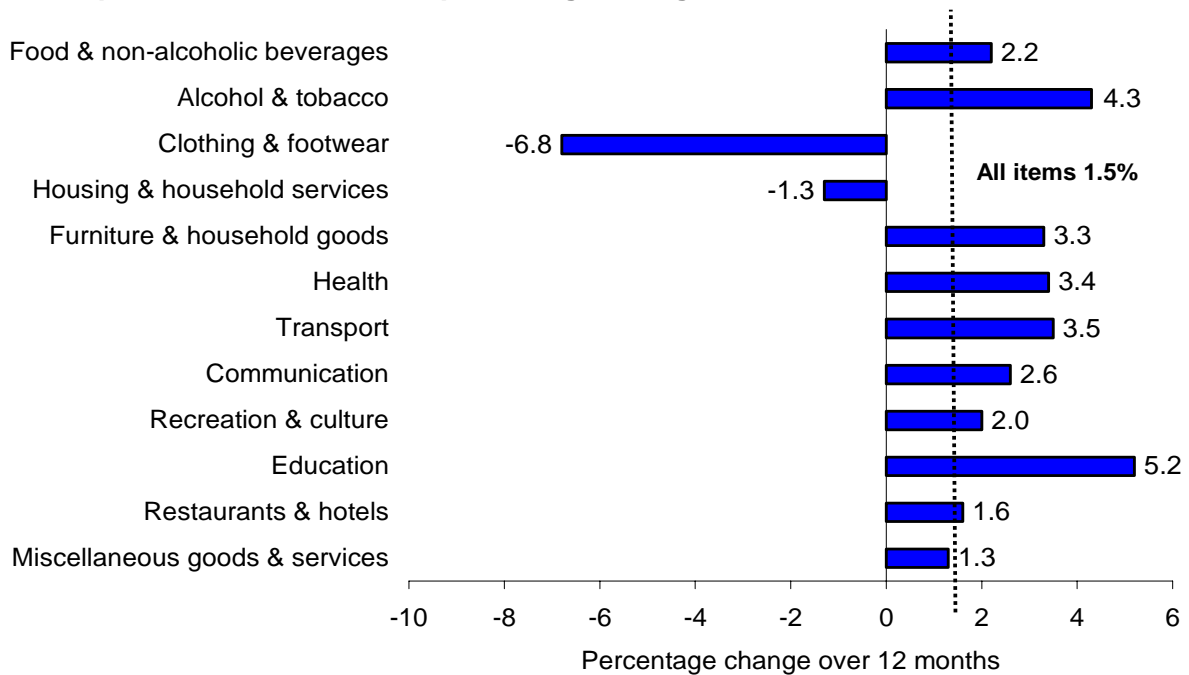

- Household services, where prices rose between September and October this year by more than a year ago, mainly due to increases in landline telephone charges
- Personal goods and services where, overall, prices rose this year but were little changed a year ago
- Leisure goods, with the largest upward effect coming from DVDs where prices increased between September and October this year but fell a year ago

**CPI main contributions<sup>1</sup> to the change in the all-items 12-month rate between September 2009 and October 2009 (0.4 percentage points)**

**CPI comparison of the 12-month percentage changes**

1. Individual contributions may not sum to the total due to rounding.

**RPI main contributions<sup>1</sup> to the change in the all-items 12-month rate between September 2009 and October 2009 (0.6 percentage points)**

**RPI comparison of the 12-month percentage changes**

1. Individual contributions may not sum to the total due to rounding.

### CPI main contributions<sup>1</sup> to the all-items 12-month rate (1.5 per cent)

### Main contributions to the all-items 12-month rate (1.5 per cent)

A large contribution to the 1.5 per cent 12-month rate came from transport which contributed 0.6 percentage points. The effect came principally from the purchase of vehicles, particularly second-hand cars which rose in price by a record high of 13.2 per cent over the year.

Recreation and culture contributed 0.3 percentage points, with the largest effects coming from package holidays and cultural services. Food and non-alcoholic beverages also contributed 0.3 percentage points principally due to food which, overall, rose in price by 1.7 per cent over the year.

A number of other divisions contributed 0.2 percentage points:

- Furniture and household goods where, overall, prices rose by 3.3 per cent with the largest rises in furniture and furnishings, major appliances and small electrical goods
- Restaurants and hotels where, overall, prices rose by 1.6 per cent over the year
- Alcohol and tobacco where, overall, prices rose by 4.3 per cent over the year

In contrast, the price of clothing and footwear fell by 6.8 per cent over the 12 months to October, which had a downward pull of 0.4 percentage points on the CPI 12-month rate. Also, the cost of housing and household services fell by 1.3 per cent over the 12 months to October; a record fall for this component which has a downward pull of 0.2 percentage points on the CPI 12-month rate.

1. Individual contributions may not sum to the total due to rounding.

### RPI main contributions<sup>1</sup> to the all-items 12-month rate (-0.8 per cent)

### Main contributions to the all-items 12-month rate (-0.8 per cent)

By far the largest downward contribution to the 12-month rate came from housing, which had a downward pull of 2.7 percentage points. Overall, prices fell by 10.8 per cent on the year, with the main contribution coming from mortgage interest payments. Also, fuel and light had a downward pull of 0.4 percentage points on the 12-month rate. Overall prices fell by 7.5 per cent on the year with the main effects coming from electricity and gas.

The largest upward contribution to the 12-month rate came from motoring expenditure, which contributed 0.7 percentage points. Overall, prices rose by 5.3 per cent over the year, principally due to a rise in the price of motor vehicles partly offset by a fall in the price of petrol and oil.

A number of other divisions contributed 0.3 percentage points:

- Leisure services where, overall, prices rose by 5.0 per cent over the year, mainly due to rises in the price of foreign holidays
- Household goods where, overall, prices rose by 4.5 per cent over the year with the largest effect coming from furniture
- Food where, overall, prices rose by 2.3 per cent over the year, principally due to increases in the price of non-seasonal food

1. Individual contributions may not sum to the total due to rounding.

## Background Notes

### Measurement of Mortgage Interest Payments within the Retail Prices Index

1. The UK Statistics Authority endorsed a proposed change from the Consumer Prices Advisory Committee (CPAC) in October 2009. This change relates to the measurement of Mortgage Interest Payments (MIPs) within the Retail Prices Index (RPI). A public consultation of this proposed change is currently underway, closing on 22 January 2010, at which time the Authority plans to reach a final decision. The ONS currently plans to introduce this change at the time of the next RPI re-weighting, which will occur in March 2010. Further details on the proposal and the consultation process can be found at:  
<http://www.ons.gov.uk/ons/about/consultations/measurement-of-mortgage-interest-payments-within-the-retail-prices-index--2009-/index.html>

### Relevance

2. The consumer prices index (CPI) is the main United Kingdom domestic measure of consumer price inflation for macroeconomic purposes. It forms the basis for the Government's inflation target that the Bank of England's Monetary Policy Committee (MPC) is required to achieve.
3. Internationally, the CPI is known as the Harmonised Index of Consumer Prices (HICP). HICPs are calculated in each Member State of the European Union, according to rules specified in a series of European Regulations developed by Eurostat in conjunction with the EU Member States. HICPs are used to compare inflation rates across the European Union. Since January 1999 it has also been used by the European Central Bank (ECB) as the measure of price stability across the euro area.
4. The retail prices index (RPI) is the most long-standing general purpose measure of inflation in the United Kingdom and is available from June 1947. It is used for a variety of purposes by both government and external users including the indexation of various incomes and prices and the uprating of pensions, benefits and index-linked gilts.

### Methodology

5. The CPI and the RPI are compiled using the same underlying price data, based on a large and representative selection of around 650 individual goods and services for which price movements are measured in around 150 randomly selected areas throughout the UK. Around 180,000 separate price quotations are used every month to compile the indices. The outlets in which the prices are collected are selected randomly. Expenditure weights are held constant for one year at a time.
6. The selection of goods and services that are priced to compile the CPI and RPI is reviewed annually. The contents of the 2009 basket are described in an article published on the National Statistics website at: <http://www.statistics.gov.uk/cci/article.asp?ID=2156>  
The expenditure weights used to compile the indices are also updated each year. Additional details of the updated CPI and RPI weights for 2009 are available from the National Statistics website in an article entitled Consumer Prices Index and Retail Prices Index: Updating Weights for 2009: <http://www.statistics.gov.uk/cci/article.asp?ID=2172>

7. Rates of change for the CPI are calculated from unrounded index levels, rather than from the published indices, which are rounded to one decimal place. The use of unrounded indices increases the accuracy of the calculation. The unrounded index levels are available on request. By contrast, rates of change for the RPI are calculated from the published rounded indices.

## Reliability

8. Once the RPI indices are published they are never revised. CPI indices are revisable although past revisions have been minimal with the exception of those arising from re-referencing of the CPI to 2005=100, which took place with the publication of the January 2006 indices.

## Comparability

9. The CPI's coverage of goods and services was extended in stages in the areas of health, education, childcare and insurance, with effect from the January 2000, 2001, and 2002 indices. In 2000, there was also a change to the population basis for the weights which was broadened from private households to include expenditure by foreign visitors and residents of institutional households. Further details can be found in a series of articles:  
[http://www.statistics.gov.uk/about/methodology\\_by\\_theme/cpi](http://www.statistics.gov.uk/about/methodology_by_theme/cpi)
10. The official CPI series starts in 1996 but estimates for earlier periods are available back to 1988. These estimates are broadly consistent with data from 1996 but should be treated with some caution. The following article provides more detail:  
<http://www.statistics.gov.uk/cci/article.asp?ID=31>
11. RPI data are available back to 1947 but have been re-referenced on several occasions since then, generally accompanied by changes to the coverage and/or structure of the detailed sub-components. Details of these changes are given in Appendices 1 and 2 of the CPI Technical Manual: <http://www.statistics.gov.uk/statbase/Product.asp?vlnk=2328>

## Coherence

12. The CPI and RPI both measure the average change from month to month in the prices of consumer goods and services purchased in the UK. However, they differ in both coverage and methodology. A detailed description of these differences is given in an article entitled "The New Inflation Target: the Statistical Perspective":  
[www.statistics.gov.uk/StatBase/Product.asp?vlnk=10913](http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=10913). The differences are summarised below:
  - In the CPI, the geometric mean is used to combine the individual prices into elementary indices at the most basic level whereas the RPI uses arithmetic means
  - The CPI excludes a number of RPI series mainly relating to housing costs (for example, council tax), and in particular to owner occupiers' housing costs (including mortgage interest payments, house depreciation and buildings insurance). In addition, the CPI excludes the annual road fund licence and, from 2006, TV licences which are classified

as taxes in the UK National Accounts, and Trades Union subscriptions which by convention are not part of household expenditure

- The CPI includes series for university accommodation fees, foreign students' university tuition fees, and unit trust and stockbrokers' charges, none of which are included in the RPI
- The CPI is categorised according to the international classification system, COICOP (Classification Of Individual Consumption by Purpose). The way in which this maps to the RPI groupings is shown in the following table:

<b>COICOP Divisions</b>	<b>RPI Groups</b>
01 Food & non-alcoholic beverages	Food
02 Alcohol & tobacco	Alcoholic drink (off sales) Tobacco
03 Clothing & footwear	Clothing & footwear
04 Housing & household services	Housing (exc. mortgage interest payments, depreciation, council tax & building insurance) Fuel & light
05 Furniture & household goods	Household goods Domestic services
06 Health	Personal goods & services (health-related items)
07 Transport	Motoring expenditure Fares & other travel costs
08 Communication	Household services (exc. domestic services & fees and subscriptions)
09 Recreation & culture	Leisure goods Leisure services
10 Education	Fees & subscriptions (education-related items)
11 Restaurants & hotels	Catering Alcoholic drink (on sales)
12 Miscellaneous goods & services	Personal goods & services (non health-related items) Fees & subscriptions (non education-related items)

- The index for the purchase of new cars in the CPI is quality adjusted and based on actual published prices for new cars. New car prices in the RPI are imputed from movements in second hand car prices
- The CPI weights are based on expenditure by all private households, foreign visitors to the UK and residents of institutional households. In the RPI, weights are based on expenditure by private households only, excluding the highest income households and pensioner households mainly dependent on state benefits
- In the construction of the CPI weights, amounts paid out in insurance claims are distributed among the COICOP headings according to the nature of the claims' expenditure, with the residual (the service charge) being allocated to the relevant insurance heading. For the RPI weights, total expenditure (that is, gross of claims paid out) is assigned to the relevant insurance heading

13. A breakdown of the difference between the CPI and RPI annual rates of inflation is shown in Table 10 of the CPI Statistical Bulletin.

### Accessibility

14. This Bulletin includes the October 2009 data, collected on 13 October 2009. Future publication dates are 15 December, 19 January, 16 February, 23 March, 20 April and 18 May. The European Commission (Eurostat) released figures for the harmonised index of consumer prices (HICP) for the month of October 2009 for EU member states, together with an EU average, on 16 November 2009. Further information on HICP for the European Union, Eurozone and other EU Member States is available from Eurostat's HICP web page: <http://epp.eurostat.ec.europa.eu/portal/page/portal/hicp/introduction>

### Further information

15. A more detailed quality report for this Statistical Bulletin is available at: <http://www.ons.gov.uk/about-statistics/methodology-and-quality/quality/qual-info-economic-social-and-bus-stats/quality-reports-for-economic-statistics>
16. A full description of how the CPI and RPI are compiled is given in the Consumer Price Indices Technical Manual 2007 edition: <http://www.statistics.gov.uk/statbase/Product.asp?vlnk=2328>
17. The mini Triennial Review of the CPI and RPI Central Collection of Prices has been published today, and is available at: <http://www.statistics.gov.uk/StatBase/Product.asp?vlnk=15315>

### General

18. Details of the policy governing the release of new data are available from the press office. Also available is a list of the names of those given pre-publication access to contents of this release.
19. Complete runs of series in this release are available to download free of charge at: <http://www.statistics.gov.uk/timeseries>

Key: - zero or negligible

2 The taxes excluded are council tax, VAT, duties, vehicle excise duty, insurance tax and air passenger duty.

1 Inflation rates prior to 1997 and index levels prior to 1996 are estimated. Further details are given in Economic Trends No.541 December 1998. These details are also available on the National Statistics website: [www.statistics.gov.uk/cci/article/asp?ID=31](http://www.statistics.gov.uk/cci/article/asp?ID=31)

3 The taxes excluded are VAT, duties, insurance premium tax, air passenger duty, stamp duty on share transactions.

Key: - zero or negligible

<sup>1</sup> Inflation rates prior to 1997 and index levels prior to 1996 are estimated. Further details are given in *Economic Trends No. 541 December 1998*. These details are also available on the National Statistics website: [www.statistics.gov.uk/cpi/article.asp?ID=31](http://www.statistics.gov.uk/cpi/article.asp?ID=31)

<sup>2</sup> The coverage of these categories was extended in January 2000; further extensions to coverage came into effect in January 2001 for health and miscellaneous goods and services; the coverage of miscellaneous goods and services was further extended with effect from January 2002 (details are given in a series of *Economic Trends* articles available on the National Statistics website: [www.statistics.gov.uk/cpi](http://www.statistics.gov.uk/cpi))

1 Published as the CPI in the UK.

2 The EICP (European Index of Consumer Prices) is the official EU aggregate. It covers 15 member states until April 2004, 25 member states from May 2004, and 27 members from Jan 2007, the new member states being integrated using a chain index formula.

The EU 25 annual average for 2004 is calculated from the EU 15 average from January to April and the EU 25 average from May to December.

3 The coverage of the European Union was extended to include Cyprus, Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia and Slovenia from 1 May 2004 and Bulgaria and Romania from 1 Jan 2007.

4 The coverage of the Monetary Union Area index was extended to include Greece with effect from Jan 2001 and Slovakia from January 2009.

**Key:** - zero or negligible

1 All components of the RPI are included in the above breakdown with the exception of mortgage interest payments, council tax and depreciation.

2 Including fuel oil.

3 The 'other goods' category comprises DIY materials, coal & solid fuels, household goods, clothing & footwear, personal articles, chemists goods, purchase of motor vehicles and leisure goods.

4 The 'utilities' category comprises water, electricity, gas, postage, telephone charges and rail fares.

5 The 'shop services' category comprises catering, repairs & maintenance charges, domestic services, personal services, maintenance of motor vehicles, TV licence & rentals and entertainment & recreation charges.

6 The 'non-shop services' category comprises dwelling insurance & ground rent, fees and subscriptions, vehicle tax and insurance, bus & coach fares, other travel costs, foreign holidays and UK holidays.

1 The differences due to housing, coverage and formula effect are all calculated independently and are not additive.

Source: National Statistics

2 Difference due to use of different formulae to aggregate prices at the most basic level.

3 This difference is derived as a residual.
